

NHS FPX 4000 Assessment 2 Attempt 1 Applying Research Skills

Applying research skills in the health care field requires you to conduct scholarly literature search and analyze evidence-based best practices. In this assessment, you will select one of the health care problems or [online class help](#) in an Assessment Topic Areas media piece and use your information literacy and library research skills to identify a solution.

1. Use the Socratic Problem-Solving Approach to Aid Critical Thinking

The Socratic problem-solving approach to aid critical thinking involves back-and-forth questioning with the purpose of triggering the student's thoughts and beliefs. This method is used to analyze complex issues or hypothetical problems.

The teacher acts more as a facilitator than an information provider. Using Socratic questions in teaching is a way to stimulate the student's critical thinking skills while also creating a fun and engaging class environment.

Students who are comfortable in front of a group are more likely to contribute to the discussion. The [BUS FPX3022 Assessment 3: SCM Case Analysis: Information Technology](#) are also more likely to admit errors in their thinking and explain their reasoning.

Unlike the historical version of this method, which relies on the professor's questions and answers, modern-day Socratic questioning is set up to drive students to a specific idea.

The Socratic method is a great tool for fostering critical thinking skills in the classroom, and it can be helpful to use this approach during NHS FPX 4000 Assessment 2 Attempt 1 Applying Research Skills. However, you must make sure that you use the correct APA style when citing sources and quotes in your paper.

2. Develop a 3-5-page Annotated Bibliography and Summary

An annotated bibliography is a type of writing assignment that asks you to evaluate and summarize sources. The [SCM Case Analysis: Information Technology](#) of this is to help you become a better researcher and find reliable information that can be used in your paper.

The first step in developing an annotated bibliography is to decide on a topic that you are interested in. This will make the process of creating a bibliography more enjoyable and allow you to focus on the content that is most important to you.

Next, you will need to cite each of the resources that you use in your research. You can cite them using either MLA or [BUS FPX3022 Assessment 3](#).

Typically, an annotation will include a citation for each source as well as a brief 3-5 sentence summary of the main points. You may also include an evaluative paragraph that analyzes the source's arguments, its reliability, and any biases or inaccuracies that might exist within it.

3. Summarize Your Research

The ability to summarize your research is a useful skill to have. This is especially true if you are taking an online class, as [NHS FPX 4000 Assessment 2 Attempt 1 Applying Research Skills](#) can be difficult to keep track of all of the information you need to complete your coursework.

A good study tool is Evernote, which allows you to organize your notes in one central location and syncs with all of your devices. The [NHS FPX 4000 Assessment 3 Attempt 1](#) also provides features like mind maps and a study planner.

Taking an online class can be stressful, but there are many tools available to help you succeed. One of the most important things to do is to choose an essay writing service that offers quality assistance with your college papers. This will save you time and allow you to focus on other things in life. The best [NHS FPX 4000 Assignment 1 Attempt 2](#) is that they will make sure your paper is free of errors, which will result in a higher grade. The best online essay writing services will also offer a money-back guarantee, so you can be confident that you will receive your money's worth.

4. Write Following APA Style

Applying research skills can help you solve a range of issues in your professional life. For instance, if you are a nurse, [NHS FPX 4000 Assessment 2 Attempt 1 Applying Research Skills](#) may need to find credible evidence to support your decisions about medication safety.

In this week's assignment, you will use your research skills to apply them to a social liberties case that wound up in the High Court of the United States. Your goal is to understand how this issue has shaped the [NHS FPX 4000 Assignment 1 Attempt 2 Applying Ethical Principles](#) of your course's case study, and how you might be able to do something about it in the future.

You will use the APA style for this paper, as well as current APA guidelines for in-text citations and references. You can visit the Writing Center in the Student Success Center, or under the Resources tab in LoudCloud for more information and guidance.
